

Suma Shine

Powder destainer / presoaker

Description

Suma Shine K2 is a powder destainer / presoaker specially formulated to provide excellent removal of stubborn stains from cups and crockery.

Key properties

Suma Shine K2 is an alkaline powder, which is suitable for presoaking / destaining of all types of heavily soiled substrates. It contains a blend of scale inhibitors and alkali for removal of dried on food from cups and crockery. The formulation also contains active oxygen for effective removal of tea, coffee and fruit stains. The product is also suitable for soaking of plastic materials.

Benefits

- Removes stubborn tannin stains
- Effectively assists in the removal of burnt-on food residues and starch
- Easy to use, free-flowing powder
- Suitable for all surfaces commonly used in the kitchen

Use instructions

1. Fill a soak reservoir with warm water (40-50 °C)
2. Add 10-20g **Suma Shine K2** per litre water (1 scoop = ca. 125 g)
3. Immerse the items in the solution for 15 - 30 minutes, depending on the degree of soiling
4. Pass items through dishwashing machine as normal

To avoid possible damage, do not soak decorated china and plastic items for longer than 30 minutes.

Technical data

Appearance	white powder
pH (1% solution)	11.5
Density (kg/l)	1.04

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Store in original container. Avoid extremes of temperature and humidity.

Product compatibility

Under recommended conditions of use, **Suma Shine K2** is suitable for use on most materials commonly encountered in the kitchen. Do not however use for alkali sensitive items such as copper and brass.
