

Clax Action

Water Conditioner Booster

1EP1

CLAX ACTION is formulated for waterconditioning in all laundries. It is effective in the sequestration of iron and water hardness (calcium and magnesium) salts.

Benefits

- ▶ Prevents fabric graying by softening water in wash solution.
- ▶ Improve soil removal on F&B linen by preventing soap scum formation.
- ▶ Prevents fabric yellowing by chelating metal ions in wash solution.
- ▶ Prevent washer extractor or CBW scaling.

Use Overview

Directions for use

1 ml/kg dosage of Clax Action will sequest 30 ppm of water hardness from mainwash.

Therefore, Clax Action dosage will be decided by amount water hardness needed to sequest from mainwash.

Clax Action boosts the soil removal performance under high water hardness condition by making water free of calcium and magnesium and not allow calcium soap to form which is insoluble in form and firmly sticks onto the fabric.

Clax Action also prevents fabric graying by sequestering water hardness ions and not allowing them to precipitate on fabric. Unsequested water hardness normally precipitates on fabric and reduce the whiteness by forming gray scales of calcium and magnesium salts.

Clax Action also has a strong chelation power towards metal ions viz. iron, manganese, copper etc. Such metals ions if not chelated form metal salts and makes the fabric yellow. Use of Clax Action helps maintaining fabric whiteness under such ion containing water.

Technical data*

Description	
Appearance	White, slightly moist powder
pH (1% Solution)	10.00 - 11.5

* The above data is typical of normal production and should not be taken as a specification

Packaging
1 X 25 Kg

Safe Handling and Storage Information

Store in original container, away from extremes of temperatures.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.
