

TASKI® Standard Damp Mop

Key Features

- ▶ Good quality, microfiber material
- ▶ Optimal soil pick-up and glide properties
- ▶ Effective bacteria removal

Advantages

- ▶ Good mop durability
- ▶ High efficiency and m²- productivity
- ▶ Hygiene security

Description

Each TASKI Standard Damp Mop is carefully manufactured with good quality materials and guarantees great cleaning results. All mops provide optimal glide and soil pick-up properties for minimal operator fatigue, while delivering high cleaning standards. The mops are guaranteed up to 300 wash cycles provided the use instructions specified by Diversey are followed.

The TASKI Standard Damp Mop is especially developed for damp mopping in areas which are cleaned often and have a hygiene demand. The microfiber mop has small loops to leave a clean and dry surface. Removing more bacteria, dust and dirt than traditional cleaning methods.

Instructions for use

The TASKI Standard Damp Mop is to be used damp, with 175% of moisture to assure the best cleaning effect. Remove the lid from the mop case and press the required Jonmaster TASKI Mop Frame against the backing of the TASKI Standard Damp Mop. The velcro panel immediately attaches the mop to the mop frame. Lift the mop out of the mop case. Start mopping along the skirting board and then work inwards. Mop with circular motion, overlapping generously so no area is missed. Do not lift the mop from the floor when mopping or turning. Do not push the mop down against the floor either. After use remove the mop from the mop frame with a quick pull of the mop tab.

Please note

- ▶ Suitable for all types of hard flat floor surfaces
- ▶ Suitable for floors with a need for hygiene and cleanliness
- ▶ Avoid using softeners and detergents containing bleach

TASKI Standard Damp Mop Specifications

Caring for your mop

- ▶ Always pre-wash or rinse the mop without detergent
- ▶ Do not launder together with other textiles
- ▶ Do not use any bleach, softener or highly alkaline laundry product
- ▶ Please take care that too high temperature or over-drying causes thermal damage to the fibers

Product Specifications
