

TASKI® Standard Dry Mop

Key Features

- ▶ Good quality, microfiber material
- ▶ Optimal dust pick-up and glide properties

Advantages

- ▶ Good mop durability
- ▶ High efficiency and m²-productivity

Description

Each TASKI Standard Dry Mop is carefully manufactured with quality materials and guarantees great cleaning results. All mops provide optimal glide and soil pick-up properties for minimal operator fatigue and good m²-performance. The mops are guaranteed up to 300 uses and washes provided the use instructions specified by Diversey are followed. The TASKI Standard Dry Mop is especially developed for dry mopping in areas which are cleaned often and where dry mopping can replace damp or wet mopping. The microfiber mop has bigger loops enabling the mop to pick up dust, dirt and hair by static electric attraction.

Instructions for use

The TASKI Standard Dry Mop is always used dry, entirely without water. Press the required Jonmaster Mop Frame (TASKI Mop Frame) against the backing of the TASKI Standard Dry Mop. The velcro panel immediately attaches the mop to the mop frame. Start mopping along the skirting board and then work inwards. Mop with circular motion, overlapping generously to not miss anything. Do not lift the mop from the floor when mopping or turning. Do not push the mop down against the floor either. After use remove the mop from the mop frame with a quick pull of the mop's tab and dispose in the laundry bag.

Please note

- ▶ Suitable for all types of hard flat floor surfaces
- ▶ Suitable for floors which are cleaned often
- ▶ Avoid using softeners and detergents containing bleach

TASKI Standard Dry Mop Specifications

Caring for your mop

- ▶ Always pre-wash or rinse the mop without detergent
- ▶ Do not launder together with other textiles
- ▶ Do not use any bleach, softener or highly alkaline laundry product
- ▶ Please take care that too high temperature or over-drying causes thermal damage to the fibers

Product Specifications

Description
